

EXHIBIT A

IN THE UNITED STATES DISTRICT COURT
FOR THE EASTERN DISTRICT OF VIRGINIA
ALEXANDRIA DIVISION

THOMAS CIENIEWICZ,

Plaintiff,

v.

GHAFOURPOUR, DDS, ET AL.,

Defendants.

: Civil Action No: 1:22cv172

AFFIDAVIT

To the Honorable Judges of the Eastern District of Virginia:

1. My name is Brittany Jones, RN, DON. I am over the age of twenty-one. I am the Director of Nursing at the Chesapeake Correctional Center (the “Jail”) and am employed by Wellpath, LLC. The information in this Affidavit is based on my personal knowledge and the medical records maintained in the ordinary course of business.

2. Mr. Cieniewicz was incarcerated at the Jail for 2 years and 8 months, from October 1, 2019 through June 7, 2022.

3. At his initial medical screening and examination in October 2019, Mr. Cieniewicz reported that he did not have any medical conditions or medical symptoms. He reported that he had problems with his lower spine, arthritis in both knees, a plate and screws in his left knee, plate and screws in his left heel, and a left index finger amputation. While his examination did not reveal any abnormalities, the provider noted that the condition of his teeth and gums were “poor” and Mr. Cieniewicz reported that he had dental pain in his upper left molar and lower back pain.

4. In 2021, Mr. Cieniewicz was 60 years old.

5. Between January 2021 and November 4, 2021, Mr. Cieniewicz was seen by medical staff 19 times for various injuries and complaints. See **2021 (dental) Chart Notes**. Of the 19 visits with medical staff, Mr. Cieniewicz reported dental pain to medical staff on three (3) occasions. On June 28th, he was seen by medical staff and it was noted that he had pain to his lower oral cavity, where there was a missing filling. It was noted that he was waiting for his scheduled dental exam and a prescription had been entered for him. On September 16th, Mr. Cieniewicz was seen for complaints of “ongoing” pain in his lower left tooth. He was seen by medical staff and referred to dental for further evaluation. On October 6th, Mr. Cieniewicz requested to add Tylenol to his medication profile for his dental pain. He complained of break through pain that was not managed by his current medication. He was prescribed Tylenol as needed for 21 days. He did not report any additional symptoms with these complaints of dental pain.

6. Between January 2021 and November 4, 2021, Mr. Cieniewicz was able to submit a Healthcare Services Request (“HSR”) form requesting dental care. When a HSR form was received by medical staff, the form was reviewed immediately and the patient was seen within approximately 48 hours for triage, to determine what the patient’s dental needs were, if any. When it was medically indicated, the triage sick call nurse scheduled an appointment with the dentist. The dentist was not on site but saw patients two (2) days per week. Between January 2021 and November 2021, the Wellpath dentist was Kourosh Ghafourpour, DDS.

7. Between January 2021 and November 4, 2021, Mr. Cieniewicz submitted HSR forms related to dental pain on five (5) occasions. See **2021 (dental) Healthcare Services Request Forms**. On May 18th, he complained that he had tooth pain because his filling fell out. He was seen by medical staff and he denied pain. It was noted that he had been referred to dental. On July 13th, he complained of constant tooth pain. He was seen and referred to dental and prescriptions

were entered for him. On July 24th, he complained of tooth pain and requested a renewal of his prescription. He was seen and was given Tylenol and Naproxen prescriptions. On September 7th, he complained of tooth pain and requested an extraction. He was seen and referred to dental. On October 29th, he requested a renewal of pain medication until the dentist could pull his tooth. He was seen and his medication was renewed for 30 days. He did not report any additional symptoms with these complaints of dental pain.

8. Between January 2021 and November 4, 2021, Mr. Cieniewicz was seen by medical providers for treatment of specific complaints on five (5) occasions. See **2021 Medical Sick Calls**. At these personal visits with physicians and other medical providers, Mr. Cieniewicz did not report any dental pain or complaints.

9. In 2021, Mr. Cieniewicz was seen by a dentist twice. Dr. Ghafourpour saw Mr. Cieniewicz on August 5, 2021 for a dental examination and noted that tooth #19 was sensitive to cold temperatures to the degree of a 2-4 out of 10 but it was short lived and there was no throbbing. See **2021 Dental Record**. Dr. Ghafourpour saw Mr. Cieniewicz again on November 9, 2021 and, after examination, he extracted tooth #19. See **2021 Dental Consent for Exam and X-Rays, 2021 Dental Consent for Extraction, and 2021 Dental Sick Call**.

10. It is my opinion that the nursing care, including medication administration, provided to Mr. Cieniewicz was reasonable, timely, and appropriate.

11. Chronic care and over the counter medications, such as Tylenol, Ibuprofen, and Naproxen, are administered to patients at the Jail twice daily at approximately 4:00 a.m. and 8:00 p.m. by medical staff. While the medical staff makes every effort to adhere to the 4:00 a.m./8:00 p.m. schedule, there is some flexibility in this timing because the medical staff works around the

security measures at the Jail. The medication passes may reasonably occur between 3:00 a.m. and 5:00 a.m. and between 8:00 p.m. and 10:00 p.m.

12. In addition, prescribed medications are administered at medication pass and at other times in accordance with the order specifications. If a medication is required by prescription to be taken at a different time or with food, the medication is administered accordingly.

13. Because Naproxen and Ibuprofen are over-the-counter medications, a patient would receive the medication at med pass, but he would be able to hold the medication until he receives his meal and take it with his meal. Medical staff typically encouraged patients to take NSAID medication with meals. In some circumstances, a patient is able to enter into a KOP (Keep On Person) Agreement, allowing the patient to keep the medication with him and take it on his own initiative. Moreover, some over-the-counter medications (for example, Tylenol, Ibuprofen, and Naproxen) were available for purchase in small quantities by inmates at the Jail canteen.

14. Medication is offered to patients at the Jail regularly and timely and in accordance with any specific directions of a prescription. The medication pass practice at the Jail is standard and reasonable and appropriately addresses the needs of the patients.

15. I have reviewed Mr. Cieniewicz's medication administration record and he was offered his medications reasonably, regularly, and timely over the course of his incarceration. See **2021 Medication Administration Record.**

16. At no time did I believe that the actions or decisions of the medical staff would cause harm to Mr. Cieniewicz. To the contrary, I believe that Mr. Cieniewicz received timely, thorough, and attentive nursing care. In addition, I have never had any malicious or negative feelings about Mr. Cieniewicz.

17. The statements in this Affidavit are true and correct to the best of my knowledge.

The attached medical records are true and correct to the best of my knowledge and are maintained in the ordinary course of business.

Dental Consent for Extraction

Name: <i>Gen. evcz</i>	ID#: 8393	DOB: [REDACTED]
Date/Time: 11/9/21 0830	Allergies:	Gender: male

Extraction(s) for Tooth Number(s)/Area # 19 Patient Initials: TMC

The frequency of complications associated with oral surgery is very low. However, with any surgical procedure, there are certain post-operative occurrences, which may or may not be experienced depending upon the nature of the procedure to be performed. These may include but are not limited to:

Possible Post-Operative Complications

- Dry socket- jaw pain beginning a few days post surgery
- Stretching of the corners of mouth resulting in cracking or bruising
- Swelling and/or bruising causing discomfort in surgical area
- Temporary slow bleeding for several hours is to be expected
- Temporary or permanent numbness or altered sensations in the teeth, gums, lips, or tongue.
- Trismus- limited jaw opening due to inflammation or swelling
- Possible infection requiring additional treatment
- Sharp edges or bone splinter, which will need a follow-up surgery
- Incomplete removal of roots, to avoid damage to vital structures such as nerves or sinus
- Sinus exposure- roots of the upper molars can be displaced into the sinus causing an opening into the mouth, this would require additional surgery
- Jaw fracture is very rare but can happen if the jaw bone is very thin or the tooth is deeply buried into the bone
- Possible damage to the adjacent teeth with large fillings, caps, or decay

Benefits of Anesthesia	Possible Complications of Anesthesia
<ul style="list-style-type: none">• Avoid pain during treatment	<ul style="list-style-type: none">• Gum irritation or bruising• Prolonged numbness or nerve damage• Allergic reaction

By signing this, I acknowledge that I have read and understand the treatment listed above and have been given the opportunity to ask questions before signing this form. I have given a complete and truthful medical history, including all medications, drug use, pregnancy, etc. and I understand by signing this form, I give my consent for surgery as well as the use of local anesthesia.

Patient Signature: *Theresa M. C. -* Date/Time: 11/9/21

Dental Consent for Exam and X-Rays

Name: <i>Cienfuegos, Thomy</i>	ID#: 8393	DOB: [REDACTED]
Date/Time: 11/5/21 0826	Allergies: _____	Gender: Male

I consent to the exam and dental x-rays that are necessary and advisable to diagnose and treat the planned service or services. The benefits of an exam and x-rays is to find hidden problems and to provide a more complete diagnosis which will help determine a more effective treatment plan. Postponing an exam or x-ray may result in worsening dental conditions or missing potential problems.

By signing this, I acknowledge that I have read and have been given the opportunity to ask questions before signing this form. I have given a complete and truthful medical history, including all medications, drug use, pregnancy, etc. and I understand by signing this form, I give my consent for exam and x-rays.

Patient Signature: *Thomy M. Cienfuegos* Date/Time: 11/5/21
Witness Signature: *Paulo* Date/Time: 11/5/21
X-ray #19

Doy mi consentimiento para los exámenes y radiografías dentales que sean necesarios y aconsejables para diagnosticar y tratar los servicios previstos. Los beneficios de un examen y radiografías es encontrar problemas ocultos y proporcionar un diagnóstico más completo que ayudara a determinar un plan de tratamiento más efectivo.

Con mi firma aquí, acepto que leí y entiendo el tratamiento mencionado arriba y que me han dado la oportunidad de hacer preguntas antes de firmar este formulario. Entregué mi historia médica completa y verdadera, incluyendo todos los medicamentos, uso de drogas, embarazo etc., y entiendo que con mi firma en este formulario, doy mi consentimiento para los exámenes y radiografías dentales.

Firma del paciente: _____ Fecha/hora: _____

Firma del testigo: _____ Fecha/hora: _____

I have explained the matters indicated above relating to the procedure including the risks, consequences, and alternatives. The patient appeared to understand and consented to the procedures described.

(No Related Actions)

Subjective: PT RETURNING YESTERDAY FROM HOSPITAL STAY FOR GI BLEED: Looked at printouts sent with pt: records are not secured in pt chart here as of yet: DX TWO DUODENAL ULCERATIONS DISCOVERED UNDER ENDOSCOPY AND TREATED: NO NSAIDS TO BE RX (pts H&H reduced) --Pt pres w c/c "Lower left tooth strong pain in cycles that progress to constant ache" "with associated jolts of high pain" -Rated cycles 10/10 dull ache, Pt wakes up at night or not sleep for time -Pt tries to chew on right side -Pt brushes site and tries to keep site clean -Cold sets off pain as well -Pt denies any swelling -Pt had no significant pain relief from pain meds helps to reduce pain for short 45min ***Pt expects release in 6mo

Note Off Status:
 Incomplete
 Note Off
Locked: Yes
Interpreter used: No

Objective: -Temp = 97.7f -Peridex rinse done -No extra oral swelling noted, pt is able to open w/o guarding -Pt had #17 ext >2years ago, #19 had fractured and was treated with Temp IRM over 2years ago -Pt points at #19 as source of pain, Palp- Perc- MOB=O #19 has 3/4 of occ+ lingual missing with sparse 2mm section of IRM still present with dark caries around the remaining structure (Bu wall remains) -Tissues are pink firm adapted

Assessment: -Xray = P/A #19 notable distal root beginning PDL widening with evidence of deeper caries to distal pulphorn sound #20 #18 -Dx = #19 degenerating Pulpal tissue restorable with Bi buildup and RCT

Plan: -Review of Findings and RBA's, pt requests ext understands tooth would have been restorable with Bi buildup and RCT. will not expect to be released for over 6mo Ext#19 -Discuss and Review findings and RBA's of TX and Post-op care -Pt agrees w/ TX consent obtained -PO STAT APAP 2 x 325mg -Tx: Achieved anesthesia using topical anesthetic and block, infiltration and intralig using 36 mg

2% lidocaine HCl and One carp 4% septo both with 1:100,000 epinephrine. -FTMPF, Gingiva reflected and elevate tooth #19 elevated and luxate delivered w/o complication. Bone burnished and compressed. Curragage and Irrigate, -Hemostasis achieved under pressure. 3-0 Chronic gut Fig of 8 x3 suture placed. - Hemostasis/gauze, pressure -Post-op instructions given orally and written. F/U PRN , dismissed A&O x 3 -Rx Post op pain meds NO NSAIDS TO BE USED FOR HX GI BLEED

Education: -Review OHI -Pt knows to let Nurses know if STS occurs to start antibiotics ..

[Last Updated: 10/22/2020 0942]

(No Related Actions)

Subjective: -Pt presents w c/c "over last year has noticed Filling come out of Upper Right bck molar" -Initially tooth was sensitive strong to cold -Over time it has reduced sensitivity ; now mildly sensitive and short lived <30sec to cold -Pt is able to brush and keep site clean -Has been using his own Advil 200mg at night as needed -No Hx swelling of gingiva **Pt expects to be here another 18 months

Note Off Status:
 Incomplete
Locked: No
Interpreter used: No

Objective: -Temp = 98.7 -Peridex rinse done -No extra oral swelling noted, pt is able to open w/o guarding -Pt has lone standing #2 with MODL prep and residual ~1-2mm of Pulpal floor IRM: with exposed walls of Clean Dentin -Pt recalls "silver filling" being in the tooth -Palp- perc- MOB=O - Adjacent gingiva and palate pink firm well adapted

Assessment: -Xray = #2 with liner of IRM remaining, tight PDL, Good structural support no signs of Fracture or pulpal inflammation Sinus proximity noted -Dx = Vital restorable with additional IRM (which is what we are limited to here) -Review of Findings and RBA's, pt requests to proceed with tx

Plan: Discuss need to place IRM and shorten occlusal contact to avoid pressure during bruxism as well as not chewing on the tooth to protect against Fracture - Ideally pt needs to have crown placed -Pt agrees -#2 and #31 do intermesh with deeply seated cuspal relation, as teeth have drifted over time. - Admin 1/2 carp 4% sept infil -Prep for retention, isolate, Matrix band, place IRM -Contour, check and reduce occlusal on #2 and move to reduce contact to be out of occlusion

Education: -Review OHI -Pt to monitor for Increasing cold or lingering sensitivity and let us know
